Bentley OnDemand eLearning Training

Bentley is providing access to their Global eLearning Portal that contains training for their products. OnDemand eLearning is self-paced, multimedia learning over the Internet that is available anytime and anyplace. There are two different types of courses offered, lectures and hands-on. Lectures are watch-and-learn sessions, usually lasting about an hour, delivered by Bentley instructors and software developers. Hands-on Courses provide step-by-step practice exercises. These courses can be opened at any time and will remember where you were when you last exited the course.

In order to access this training, you will need a Bentley login. If you don't remember your login information, contact Bob Peterson or Paul Wheeler and we can reset your password or create a new username and password.

To access the available courses:

- Navigate to the Bentley LEARN Server Global eLearning Portal and Login.

- Click the Find courses and register! Link (located in the main section of the page or in the navigation section on the left side of the page), then select the Find OnDemand eLearning Courses catalog to view the course schedules and descriptions.

- Select the View OnDemand courses included with Bentley SELECT link to see the courses that are offered.

Recommended classes:

MicroStation V8 XM Edition for CAD Users
Course Description: This course is designed for experienced CAD users who want to transition existing CAD knowledge to MicroStation skills. To ease the transition to MicroStation, parallel references are continually given, showing how MicroStation handles operations familiar to the CAD user. Subjects covered range from the initial setup of a new design file, to incorporating existing data from non-MicroStation CAD products. Plotting and other output considerations are covered, including PDF creation.

MicroStation V8 XM User Update from V8 2004
Course Description: This course covers many of the new features and capabilities of MicroStation V8 XM Edition with an emphasis on user interface and productivity gains. All of the major new capabilities of V8 XM Edition are covered in a series of hands-on exercises. Learn about Task based interfaces and Project Explorer among other topics.

The Currently Registered Training tab lists all learning activities for which you have signed up but not completed. Click the Launch button to open a new browser window to access OnDemand eLearning lectures or hands-on courses.
